

# FULL FACE LIFT

Parkway Hospitals **Singapore**

Look younger  
Feel younger

## Full Face Lift

### Facelift

The face is probably the most visible feature through which expressions of feelings are conveyed to the outside world. The aging process however, may impact those expressions significantly: sagging of facial tissues, skin wrinkles, droopy eyelids, loss of facial volume all can have an impact of how the outside world see us and how we look at ourselves.

**Length of hospital stay 1 night.**

## Regain Your Confidence back

A facelift can help to restore a more confident and youthful you. Facial contour is improved with a better defined jawline contour, smoother neck. Loose sagging skin around the jowls area can also be eliminated.

### Deter the aging process

Beyond the lightening of wrinkles and removal of excess fat on certain areas, a facelift can help address the effects of heredity, sun exposure, pollution, smoking,

creating a new you which may look a decade younger than your real age.

## Rejuvenated and youthful appearance

One of the most important feedback as reflected by patients after a facelift procedure is the numerous compliments on the 'fresh' look they now portray. This can have a very positive impact and complements their energetic physiological well being, bringing an enormous impact on their social and professional lives.
