

TOTAL HIP REPLACEMENT

Mahkota Hospital Malaysia 2009

THR is the removal of damaged areas of the bone from the hip joint and replacement with an artificial ball and socket joint.

Feel better, walk again without pain, enjoy your improved quality of life!

Total Hip Replacement

Total Hip Replacement (THR), also known as Hip Arthroplasty, is an orthopedic procedure commonly used to alleviate pain caused by Hip Arthritis and entails the removal of damaged areas of the bone from the hip joint and replacement with an artificial ball and socket joint.

If you have been suffering from restricted movement and walking due to a damage hip, you are now able to have a Total Hip replacement to restore the

motion and function of your hip. Hip replacement surgery is successful more than 90 percent of the time.

Reduced Joint Pain

Once the new joint has healed, a person should be able to return to most routine activities of daily living, minus the pain.

Enjoy improved quality of life

Rediscover your favorite pastime recreational activities that you once loved such as walking, bicycling or playing golf.

Do note, however, that high-impact sports such as running, jogging; jumping will be discouraged because they can add unwanted stress on your new joint. Lifting weights greater than 20 pounds should be avoided as well.

Length of stay: 4 nights
